Storyline

George Smiley is called out of retirement when one of his former assets, an émigré general, is found murdered. In tidying up loose ends for the "Circus", his former employer, he discovers a clandestine operation run by his nemesis, Karla, for his own personal benefit. Smiley is able to use this irregularity against Karla, forcing him to defect to the West. The murder of a Soviet defector forces his old handler, British spymaster George Smiley, out of retirement. His investigation leads to an old nemesis, the Soviet spymaster known only as "Karla". The 'Circus', is so overwhelmed by political considerations that it doesn't want to know what happened. Smiley begins to follow up the clues of his friends' past days, discovering that the clues lead to a high person in the Russian Secret Service and a secret important enough to kill for. Smiley continues to put together the pieces a step ahead or a step behind the Russian killers. This will be their final dance.

Review: Definitely the best film version of the books. More artful than Tinker Tailor and much more intense. The characters are more developed, especially Smiley's. The end of the movie had me on the edge of my seat, the suspense was incredible. If you enjoy spy films, this is absolutely essential viewing. (IMDb)
