Doctor Who - Series 2- Complete

The **second** series of British science fiction programme Doctor Who began on 25 December 2005 with the Christmas special "The Christmas Invasion". Following the special, a regular series of thirteen episodes was broadcast, starting with "New Earth" on 15 April 2006. In addition, two short special episodes were produced; a Children in Need special and an interactive episode, as well as 13 TARDISODEs. It is the second series of the revival of the show, and the twenty-eighth season overall.

This is the first series to feature David Tennant as the tenth incarnation of the Doctor, an alien Time Lord who travels through time and space in his TARDIS, which appears to be a British police box on the outside. He continues to travel with his companion Rose Tyler (Billie Piper), with whom he has grown increasingly attached. They also briefly travel with Rose's boyfriend Mickey Smith (Noel Clarke), and Camille Coduri reprises her role as Rose's mother Jackie. The series is connected by a loose story arc consisting of the recurring word "Torchwood". This is also the first series to be preceded by a Christmas special, which was commissioned to see how well the show could do at Christmas. The success of "The Christmas Invasion" led to the Christmas special becoming an annual tradition.

Prime Minister Harriet Jones is threatened by the leader of the Sycorax to give them half of the Earth's population as slaves; Harriet tries to negotiate and is teleported on their ship. Rose, Mickey, and Jackie drag the Doctor onto the TARDIS, but the TARDIS is detected by the Sycorax and they transport it to their ship, with Rose, Mickey, and the Doctor inside. Cassandra possesses Rose's body as she is in need of one. The Doctor and Cassandra discover that the hospital holds hundreds of artificially-grown humans that have been infected with diseases so the Sisters of Plenitude can find their cures. Cassandra releases several of the humans as a distraction, but they release others and a zombie-like attack begins. The Doctor sprays the infected humans with an intravenous solution using a disinfectant shower, curing them. The Doctor orders Cassandra out of Rose and she transfers her consciousness to her servant Chip, but his cloned body fails and Cassandra accepts her death.

The Doctor and Rose go to Scotland in 1879, where Queen Victoria invites them to the Torchwood Estate. Unknown to them, the estate has been captured by a group of monks who have brought a werewolf in hopes to infect Queen Victoria and establish an "Empire of the Wolf". The Doctor notices the trap and tries to shield himself, Victoria, and Rose from the werewolf. He learns that the estate was designed as a trap for the werewolf as it contains a large telescope which, with Victoria's Koh-i-Noor diamond and full moonlight, can kill the werewolf. Though they save her, Queen Victoria is unnerved by the Doctor and Rose's modern eccentricities and founds the Torchwood Institute to defend Britain from further alien attacks.								
170	3	"School Reunion"	James Hawes	Toby Whithouse	29 April 2006	2.3	8.31	85
The Doctor works undercover as a teacher in a school which Mickey believes is suspicious. Rose, working as a dinner lady, notices the cafeteria's chips have an adverse effect on other members of the kitchen staff, while the Doctor notes the chips seem to make the students more intelligent. The success of headmaster Mr Finch has aroused media attention; investigative journalist and the Doctor's former companion Sarah Jane Smith arrives at the school and discovers the TARDIS. She and her robotic dog K9 join up with the Doctor, Rose, and Mickey and they discover that the teachers are actually Krillitanes and the chips are coated with Krillitane oil, intended to make the children smart enough so they can decode the "Skasis Paradigm", a theory of everything, which will give the Krillitanes full control of time and space. The Doctor refuses to join the Krillitanes and evacuates the children, after which K9 detonates the container of the chip oil which destroys the Krillitanes, the school, and K9. Sarah Jane declines the Doctor's offer to travel with him and suggests that Mickey do so instead, and the Doctor gives her a brand new model of K9.								
171	4	"The Girl in the Fireplace"	Euros Lyn	Steven Moffat	6 May 2006	2.4	7.90	84
The Doctor, Rose, and Mickey arrive on an abandoned spaceship which contains several "time windows" into the life of Madame de Pompadour, known as "Reinette". The Doctor first enters her bedroom in Paris through an 18th-century fireplace when she is seven years old and saves her from a clockwork man which has hidden under her bed. On the ship, the Doctor and his companions discover more time windows into Reinette's life in 18th-century Versailles and see that the clockwork droids continue stalking her, but do not consider her "complete". The Doctor discovers that the droids murdered the ship's human crew and recycled some of their organs for use in the ship but still needs Reinette's brain to be fully functional. The brain must be 37 years old, the age of the ship; the ship is actually named after Madame de Pompadour. The Doctor manages to arrive at some point after her 37th birthday and save her from the droids, who shut down because they have no way of returning to their ship.								
172a	5	"Rise of the Cybermen"	Graeme Harper	Tom MacRae	13 May 2006	2.5	9.22	86
A problem causes the Doctor, Rose, and Mickey to reach a parallel universe, with no way of getting back home for 24 hours. In the parallel universe, most of humanity wears EarPods that feed information directly into the wearer's brain and Rose's father Pete is still alive. The EarPods are designed by John Lumic, who is trying to give them an "upgrade" which will ultimately turn the humans into Cybermen. Though he has not received permission to do this, he has been abducting and converting numerous homeless people. Mickey is mistaken for his parallel universe self Ricky and is taken by Jake Simmonds, a member of a gang called the "Preachers" who are aware of the dangers of the EarPods. Cybermen begin attacking at the parallel universe Jackie's birthday party, at which the Doctor and Rose are posing as waiters. They, along with Pete, escape and run into Mickey and the Preachers, but the Cybermen close in on them.

Escaping from the Cybermen, the group go to Battersea Power Station , where Lumic uses a transmitter to control London's EarPod-wearing population and send them to be converted into Cybermen. On the way, Ricky is killed by the Cybermen. The group splits into three smaller groups to stop the conversion. Eventually, Mrs Moore is killed and the Doctor, Rose and Pete are captured by the Cybermen and taken to Lumic, who has become the Cyber Controller. Mickey and Jake disable the transmitter on the zeppelin , freeing the humans who had not been converted. Mickey hacks Lumic's database to find the code to cancel every Cyberman's emotional inhibitor and sends it to Rose's phone; the Doctor plugs the phone into the computer systems which changes the signal and sends the Cybermen into despair. They escape the exploding factory on the zeppelin and Pete cuts the ladder Lumic is climbing up, sending him to his death. Mickey decides to stay and help fix the parallel universe with Jake and take care of Ricky's grandmother, as he understands Rose prefers the Doctor.

The Doctor and Rose land in London in 1953 on the day before Queen Elizabeth II's coronation . The Doctor befriends teenager Tommy Connolly, whose grandmother is hidden because she lacks any facial features and has no brain activity, a phenomenon that is common with those who have purchased television sets sold cheap for the coronation from Magpie Electricals, owned by Mr Magpie. Rose, investigating the shop, finds that Mr Magpie is under the influence of an entity known as " the Wire ", a fugitive who has converted herself to an electrical form and is using the televisions and hopefully the upcoming coronation to consume enough minds to rebuild its body; she takes Rose's face as well. In discovery of this the Doctor is outraged and foils the Wire's plan with a device he creates, and those whose minds and faces were consumed are returned and London can safely watch the coronation.								
174a	8	" The Impossible Planet "	James Strong	Matt Jones	3 June 2006	2.8	6.32	85
The Doctor and Rose arrive on a base on a planet which is impossibly orbiting a black hole . The crew of the base, who are there on an expedition to drill to the middle of the planet, is led by Captain Zachary Cross Flane. A race of aliens known as the Ood serve them. A quake strikes the planet, causing several sections of the base, including the one where the TARDIS was, to fall into the planet. As the drill nears the planet's centre, the Ood begin foretelling the awakening of a " Beast ", which possesses archaeologist Toby Zed and later the Ood. The drilling finishes, and the Doctor offers to go with Ida Scott to the depths of the planet, where they discover a disc with unreadable markings found on the base and the possessed Toby's face. The Doctor believes the disc to be a door, and as it begins to open the possessed Toby tells Rose that the planet has begun to fall into the black hole and the voice of the Beast announces that he is free.

The Doctor descends into the dark pit and the Beast speaks to him, revealing he is the epitome of evil of several religions and has been sealed inside the planet, but is seeking to escape. The Doctor runs out of rope and believes he can survive the drop and falls, the news of which distresses Rose. Most of the crew and Rose escape from the Ood and board and launch an escape rocket. The Doctor discovers he has survived the crash and finds the physical form of the Beast. The Doctor realises his consciousness has managed to escape. Having faith in Rose, the Doctor triggers the sequence for the Beast and the planet to fall into the black hole, but as the Beast's consciousness is inside Toby the rocket begins to pull toward the black hole . Rose realises this and releases Toby from the rocket, and the Doctor finds the TARDIS in the pit and uses it to rescue Rose.

The Doctor finds that she is possessed by an Isolus , an alien life form that has crashed on Earth and can relate to Chloe's loneliness. For the Isolus to leave Chloe's body, they must find the Isolus' pod and give it power; Rose finds it under just-poured tar in the street and is able to power it by throwing it into the Olympic Torch as it comes by the street, giving the pod heat and emotional strength. As the missing children reappear, the demon-like drawing of Chloe's violent and dead father comes to life, but Chloe's mother calms Chloe's fears. The Isolus peacefully leaves Chloe's body.

<p>The four Daleks, later identified as the Cult of Skaro, have brought a device known as the Genesis Ark through the breach and declare war on the Cybermen and the two races begin fighting worldwide. Meanwhile, the Doctor has discovered that Jake Simmonds, Pete Tyler, and Mickey – who masqueraded as a Torchwood employee and is with Rose and the Daleks – have been able to travel between the universes. The Cult of Skaro is keeping Rose and Mickey alive because they, being time travellers, would activate the Genesis Ark, which the Daleks are incapable of as it is stolen Time Lord technology. The Doctor plans to open the breach, which will pull in anyone who has crossed the Void including the Daleks, Cybermen, and Rose's family, and then close the breach. Rose refuses to reside in the parallel universe and stays to help the Doctor, but she is unable to hold on and becomes marooned in the parallel universe. The Doctor is able to transmit his image through one of the final breaches, and the two share a tearful goodbye before a mysterious woman in a wedding dress appears in the TARDIS.^{[N?]}</p>

How many actors have played The Doctor?

How many actors have played The Doctor?

19 actors have played the role of The Doctor so far.

While there are officially 15 numbered Doctors, due to alternative versions of the character as mentioned in the list above, there have actually been 19 different incarnations of the Time Lord over the years.

This list is specific to the TV show however and doesn't take into account spin-off material, such as the 1965/66 films where actor Peter Cushing played the protagonist.
