Title: Kingsman: The Secret Service

Storyline

The first film, Kingsman: The Secret Service, is set over the course of two years, from 2014 to 2015. Having dropped out of training for the Royal Marines, becoming a stereotypical chav and being arrested for stealing a car, Gary "Eggsy" Unwin's release is arranged by Harry Hart, a Kingsman and his late father's colleague. Hart, a veteran spy of the secret organisation Kingsman, recruits Eggsy into the agency's competitive training programme as a global threat emerges from a billionaire, Richmond Valentine.

The concept of an adaptation of The Secret Service originated when Millar and Vaughn were at a bar discussing spy movies, lamenting that the genre had become too serious and deciding to do "a fun one." To have the time to make the film, Vaughn had to opt out of directing X-Men: Days of Future Past, which he called "a really tough decision". He reasoned that if he did not do it, "somebody else ... [would] wake up and do a fun spy movie. Then I would have written a bloody screenplay that no one would want to make." Colin Firth joined the cast to lead the film on 29 April 2013. It was initially reported in 2013 that Leonardo DiCaprio was in talks to play a villain, but Vaughn denied that he was ever considered. Instead the role went to Samuel L. Jackson. Jackson took the role in part because of a careerlong dream to be in a James Bond movie. He felt that this was unlikely to come true and said, "I felt like this was an opportunity to play a really great Bond villain." Jackson's character has a notable lisp, a choice he decided to make based partially on the stutter he had as a kid. In September 2013, Vaughn cast Sophie Cookson as the female lead, preferring a newcomer over more obvious candidates like Emma Watson and Bella Heathcote. Mark Hamill was cast as Professor James Arnold, a reference to his character in the source comic book being himself.

Principal photography began 6 October 2013 in Deep cut, Surrey, on a budget reported to be one-third of the \$200 million budget of Skyfall. The Alexandra Road Estate in Camden was used for Eggsy's home area, and some scenes were filmed at Imperial College London. The Black Prince Pub in Kennington, South London, was used for various fight scenes and the car chase. Savile Row in Mayfair was also employed as a location and the exterior of tailors Huntsman, which provided the clothes, and James Lock & Co. in St James's, which provided the hats. Elton John was rumoured to have a role in the film. Although this would prove untrue, John would appear in the film's sequel. Kingsman: The Secret Service was released in the United Kingdom on 29 January 2015. [Wiki](#)

Title: Kingsman: The Golden Circle

Storyline

One year after defeating Richmond Valentine, Gary "Eggsy" Unwin has officially joined the Kingsman intelligence service, taking his late mentor Harry Hart's title of "Galahad", and begun a relationship with Tilde, Crown Princess of Sweden. He is ambushed by Charlie Hesketh, a former Kingsman trainee who lost his arm and vocal cords during the Valentine incident, replacing them with cybernetics. Eggsy evades Charlie and his henchmen in a car chase across London, but Charlie's severed cybernetic arm hacks into the Kingsman database through Eggsy's car. Charlie passes the information to Poppy Adams – leader of the world's largest drug cartel, the Golden Circle – who launches a volley of missiles that destroy the Kingsman headquarters and wipe out all its agents in Britain, aside from Eggsy and Merlin, Kingsman's tech support.

Kingsman's emergency protocol leads Eggsy and Merlin to Statesman, an American private intelligence service posing as a Bourbon whiskey distillery in Kentucky, as well as Kingsman's American counterpart. There, they discover that Harry survived his shooting thanks to Statesman nanotechnology, but is suffering from amnesia. They also learn about the Golden Circle from Statesman leader Champagne, and the two agencies agree to work together to bring the cartel down. Statesman agent Tequila later develops a blue rash and shows signs of mania, and is replaced by agent Whiskey as Eggsy's partner. Eggsy plants a tracking device on Charlie's ex-girlfriend Clara Von Gluckfberg during a sexual encounter at Glastonbury Festival, but his revelation of the mission to Tilde strains their relationship.

Eggsy cures Harry's amnesia by threatening to shoot a Cairn Terrier puppy that resembles Harry's late dog, shortly before Poppy broadcasts a message to the world about a toxin she has secretly added to all her drugs, which causes users to develop symptoms like Tequila's before paralysis and, ultimately, death. She offers the antidote if the President of the United States ends his country's war on drugs and grants her cartel immunity from prosecution. The President – who is revealed to be corrupt – decides to quarantine everyone affected, intending to let them all die to put Poppy out of business and rid the world of drug users, whom he sees as criminals.

Eggsy, Harry, and Whiskey track Clara to the Golden Circle's antidote factory in the mountains of Italy. Eggsy steals an antidote sample, which is broken by Whiskey during an ambush by the Golden Circle's henchmen, leading Harry to suspect him of working against them. Harry shoots Whiskey in the head, but Eggsy, believing Harry to be delusional as a result of his recovery, saves him with nanotechnology as Charlie destroys the antidote factory, killing Clara for unwittingly betraying the Golden Circle. Tilde calls Eggsy in a manic state, revealing she has been affected by the blue rash after taking drugs due to her stress over Eggsy's infidelity. Eggsy, Harry, and Merlin discover the location of Poppy's hideout, "Poppy Land", in Cambodia and fly there to steal the laptop which can deploy the drones carrying the antidote.

Arriving at Poppy Land, Eggsy steps on a land mine, but Merlin switches places with Eggsy and sacrifices himself instead. Storming the lair, Eggsy kills Charlie while Harry destroys Poppy's robotic attack dogs with the help of Elton John, who had been kidnapped by Poppy. They secure the laptop and inject Poppy with a concentrated dose of her own toxin-infused heroin. Poppy gives them the laptop password in a drugged state but dies from an overdose due to the heroin. Whiskey interrupts them before they can deploy the drones, revealing that he wants all drug users to die after his pregnant wife was killed in a robbery by meth addicts. Furthermore, the elimination of all drugs will cause the stock price of Statesmen Whisky to skyrocket since people will depend much more on alcohols, making Whiskey and

his statesmen members rich. Eggsy and Harry fight and kill Whiskey by pushing him into an industrial shredder, then deploy the drones to release the antidote, saving the affected victims throughout the world.

The President is impeached for conspiring to commit genocide against drug victims, and Statesman purchases a distillery in Scotland to help rebuild Kingsman. Statesman tech support specialist Ginger Ale is appointed to Whiskey's position, Eggsy marries Princess Tilde, becoming a Prince of Sweden, and Tequila takes an exchange assignment at Kingsman, which acquires a new tailor shop in London.
